

Goodsense Electric Side Loader Forklift With Innovative Hydraulic System Sideloader Forklifts

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: GOODSENSE
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: Bare packaging
- Delivery Time: 30-40work days
- Payment Terms: T/T

Product Specification

- Name: Forklift
- Feature: High Safety
- Place Of Origin: China
- Brand Name: Goodsense
- Condition: New
- Energy Supply: Reference Introduction
- Advantage: Small Vibration And Noise
- Highlight: **goodsense electric side loader forklift,
hydraulic system sideloader forklifts,
goodsense sideloader forklifts**

Product Description

Designed & built from the ground up

Compact, lightweight, wise.

The compact AC powered side loader electric forklift is predicted to change the worldwide market for sideloaders. The goal was to produce a highly efficient and sustained electric machine capable of efficiently working in small spaces.

Creating a smaller, lightweight chassis, involved designing a series of corrugated sections to provide rigidity and firmness. The steering axle provides a lower centre of gravity.

- √ Efficient, smart and tough
- √ 4.4 metres in length
- √ Marvelous work cycles

Key Features

ZERO EMISSIONS

In developing electric side loader forklift the goal was to produce a highly efficient and sustained machine capable of working in fastidious adhibitions. Electrics offer zero emissions, are cheaper to run and maintain, as well as offering a better operator environment. Noise and cost savings will also benefit from the forklift.

INNOVATIVE HYDRAULIC SYSTEM

Through closed-loop control, the hydraulic pressure is adjusted depending on the load, saving energy and improving efficiency.

INCREASED BATTERY PERFORMANCE

The innovations, 80v/500Ah power supply has increased battery performance.

AC WIRING SCHEMATIC

Electric side loader forklift allows a larger, intelligent battery system, created specifically for GOODSENSE in a custom arrangement. This in turn is complemented by an AC wiring schematic, featuring individual cables directly connected to each component to provide maximum efficiency.

IMPROVED TURNING CIRCLE

The reduced length & improved turning circle have been achieved without sacrificing the mast or well width, clearance & low bed height.

The Range: Mid-Sized, Compact

Electric side loader forklift was launched following many years of painstaking research and features an intelligent battery system, refined chassis and wiring schematic. This the most compact model ever produced, measuring 4.4 metres in length & 925mm in platform height.
